DETAILED ACTION

Continued Prosecution Application

The request filed on 10/10/2000 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/361,425 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1,2,5-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robinson et al. taken with Mason et al.

Application/Control Number: 09/361,425
Art Unit: 1653

Robinson et al. (previously referenced "Reed et al." in the Office Action dated 1/10/2000) taken with Mason et al. which teaches the addition of water-soluble vitamins and derivatives and other anti-oxidants to further improve stability, utilize therapeutic qualities and generally optimize the usefulness of the composition as a whole. (See Col. 8 line 62- Col. 12, line 63). Thus, where Robinson et al. is silent about additional methods of increased stability and utility of the compositions it would have been obvious to one of ordinary skill in the art to have modified Robinson et al. by using the teachings of Mason et al., which references when combined teach all of claims 1,2,5-13 and 15. Therefore, the claimed invention was within the ordinary skill in the art to make and use at the time it was made and was as a whole, *prima facie* obvious.

Applicant's arguments filed 4/13/2000 have been fully considered but they are not persuasive.

Applicant's argue that the Robinson et al. (previously referenced "Reed et al. in the Office Action date 1/10/2000) reference does not teach the use of other oxygen-labile species or antioxidants to stabilize retinol containing compositions, nor does it teach the presence of N-acetyl cysteine in the compound as a stabilizer per se. In response to applicant's argument that N-acetyl cysteine is not identified as a stabilizer per se, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). Furthermore, the fact that it is well known in the art to use N-acetyl cysteine as a stabilizer can be witnessed in the current

Art Unit: 1653

application. (See Specification, page 1, line 25 – page 2, line 10). Finally, Applicant's argument regarding Robinson et al. not teaching the use of other oxygen-labile species or antioxidants with retinol is overcome by the new rejection, and is therefore moot.

Conclusion

This is a CPA of applicant's earlier Application No. 09/361,425. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
